OBJECTIVE

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, passionate about building real-world solutions through hackathons and innovative projects. Experienced in developing AI-powered applications and working in fast-paced team environments.

EDUCATION

- Guru Tegh Bahadur Institute of Technology (GTBIT)
B.Tech in Computer Science (AI/ML) | 2025 – 2029
- Maharaja Agrasen Public School
Class XII (PCM + CS) | 2025
- Ramjas Public School (Day Boarding)
Class X | 95.6%

TECHNICAL SKILLS

- Languages: Python, C
- Libraries: Pandas, NumPy, Matplotlib, Seaborn
- Technologies: Machine Learning (Basics), Data Analysis, Computer Vision (Basics)
- Tools: Git, VS Code, Jupyter Notebook

PROJECTS & HACKATHONS

- ◆ **Med-Veritas – AI Healthcare Authenticity App -CODEZEN 2.0 (GTB4EC)**
 - Built an AI-powered system to decode handwritten prescriptions using OCR and Medical LLMs
 - Developed a verification module to detect counterfeit medicines using computer vision techniques
 - Designed a feature to simplify dosage, side effects, and drug insights for better patient understanding
 - Tech Stack: Python, Google Vision API, LLM APIs
- ◆ **Invest Ninja / SchemeMatch – India Innovate 2026**
 - Developed an AI-driven platform to match startups with relevant government schemes and funding opportunities
 - Designed AARAMBH module for feasibility analysis using multi-dimensional risk scoring

- Implemented automated proposal generation and eligibility filtering to improve approval success rate
- Tech Stack: Python, LLM APIs, GROQ, SETU API, OAuth

◆ **Invisible Cloak- Tarang 2.0 Hackathon – GTBIT (3rd Position)**

- Collaborated in a team to design, prototype, and present a fun project

CERTIFICATIONS

- Machine Learning with AI – IST
- Programming in C

AREAS OF INTEREST

- Artificial Intelligence
- Machine Learning
- Web Development
- Problem Solving

SOFT SKILLS

- Teamwork
- Communication
- Quick Learner
- Creative Thinking
